Miscellaneous

Murphy TTD control panel
Murphy TDXM missing
Murphy EICS controls with muffler and catalyst
24V electric starter

Notes

This unit was packaged by Dragon Products in 2015. The engine has Murphy EICS, integrated cd ignition, air/fuel controller, and electronic governing speed control. Critical grade exhaust silencer with 30 to 38 dba noise reduction and Murphy emissions kit with precious metals catalyst. Type K thermocouples to monitor catalyst inlet and outlet temperatures and two exhaust outlet test ports.

Unit was originally packaged as a 3-stage but converted to a 2-stage, replacing the 5.125" x 3" tandem with a 5.125" DA. The IC-2 and AC sections were replaced with a new AC section. The third stage scrubber was removed from the package during the 2-stage conversion. This unit could be converted back to a 3-stage with an estimated cost of \$15,000 for a new IC-2 and AC section from AXH.

Weight: 30,000#

Dimensions: 22'-4 1/2" L x 10-6" W x 12'-9 3/16" H
